

REJECT PETITION 04-160

Satellite radio is the best thing that has happened to broadcast airwaves since FM. If it wasn't for public supported radio stations there would be a total lack of quality programming. Satellite radio has enabled the public to hear an enormous variety of programming they would never get a chance to otherwise. Especially since I pay for the service, I should be able to get what I want, not what Clear Channel wants me to listen to.
